AFTER CHIEF HEALEY'S SCALP

Belief in Manchester That Present Chief Is Slated for Retirement.

Manchester, N. H., Oct. 25.—Chief of Police Michael J. Healey seems slated for retirement. The present belief is that William T. Nichols, former managing editor of the Manchester Union and publicity man for the Democratic state committee during the last two campaigns, will be the next chief. Congressman Eugene H. Reed, who is openly after Chief Healey's political scalp, has been here this week and had several conferences with Chairman John B. Jameson of the Democratic state committee, Judge John W. Gendron, chairman of the local Democratic city committee, and others on the police situation.

The reorganization of the police commission of the state by the last legislature was generally understood to have been done for the purpose of getting Healey. The new Manchester commission was named about six weeks ago by Gov. Feltner and was said at the time to be anti-Healey, nothing has been done toward removing the chief up to now. It is the general belief, however, that at the next meeting Chief Healey will be removed and either Mr. Nichols or some other democrat named in his place.

Nichols has been a candidate for postmaster and Healey's desire to give Nichols the police berth may be due to a wish to simplify the postmaster-ship tangle and pave the way for the appointment of John R. Willis.

HOPE OF FINDING MORE ABANDONED

Fifty-Four Bodies Have Been so Far Recovered and 209 are Still Entombed.—Two of Rescue Squad Meet Death

Dawson, N. W., Oct. 24.—Fifty-four bodies had been recovered tonight from the chambers of the Slog Canon Mine No. 2; two deaths had been added to the mine total and government experts, now in charge of the work of the rescue, concede that 209 bodies are still within the gas-filled chambers.

Thirty-six bodies have already been buried, a union service for all taking place late today. The work of searching for bodies is still going on, but hope that more miners will be rescued alive has been abandoned.

The two deaths added to the list were those of rescue men, James Lard and William Tolst. The men were members of a rescue squad which entered the mine in the early morning. They did not return and it was only after the experts of the United States rescue car had search six hours that

ENDEAVORING TO LOCATE PARTY

York County Officials Working to Locate Party Who Left Body of Baby in Bushes.

The York county officials are working on new clues in connection with the finding of the body of a baby boy in a clump of bushes by the side of the road at York Harbor, one week ago Friday afternoon. One of the clues, it is believed will lead to something important, and may terminate in developing who the mother of the infant is and who the party was that left the body where it was found.

Sheriff Frank M. Irving has put more or less time on the case and is assisting Deputy Sheriff Bradford Woodward of York who is following up all clues.

The body of the infant was wrapped in a woman's night dress, and on the outside was wrapped a waitress' apron which was held together with three safety pins.

The infant was apparently a full sized baby and well developed. According to Dr. Gordon of Ogunquit, who was called in his capacity as a coroner, the child had been dead a month or more. The indications were that the child was born alive.

The waitress' apron is one of the clues which the officers have to work on. They have talked with one woman who came to York from New Hampshire and have also interviewed a physician. This woman denied knowledge of the case.

The bundle was discovered by George H. Donnell, who was raking over some leaves on the road side near his home on the back road, running from the railroad station to the Hotel Alhambra. He noticed the white cloth partly hidden by the leaves and pulled it over with his rake, and was horrified to see the body of a baby laid out.

A further investigation developed that an attempt was made to make a hole in the ground by the party who carried the body of the infant to the place where it was discovered, with the heel of a shoe and after laying the bundle down the party covered it with leaves.

It is believed by the officials that the body was placed where it was found by some person living outside of the town.

SIX KILLED IN GAS EXPLOSION

Scores are Frightfully Burned in New York Factory Building Fire and Two Hundred Have Narrow Escapes from Building.

New York, Oct. 24.—A gas oven in which metal was being enamelled, on the top floor of a six story factory building in Canal street, exploded today, killing four persons. More than a score of others were injured or burned in the fire that succeeded the explosion and some of them may die. Three of those killed were women. All were workers in the building.

Searchlights played on the ruins tonight while firemen sought for more bodies which it was thought might have been overlooked when entry to the building was effected after the flames had been brought under control, but at 5 o'clock after four bodies had been recovered, it was believed all the dead had been found. The district attorney's office began an investigation.

About 200 persons were employed in the building, which was occupied by manufacturers of machinery, mirrors, clothing and other goods. The escape of some of the trapped workers was spectacular. With their clothing ablaze, they climbed out through flame swept windows onto fire escapes and leaped to the sidewalks. Many were badly injured by the drop from upper floors. Spectators beat out the flames from their clothing and saved them from burning to death.

Late tonight firemen came across the mangled body of a young man who had met death while in a crouching position apparently trying to shield his face from the intense heat.

John Gonzolo, 16 years old, died in a hospital bringing the death list up to six.

STRUCK TWICE IN 24 HOURS

Schooner William H. Clifford Loses Large Part of Rigging.

Vineyard Haven, Oct. 24.—After figuring in two collisions within 24 hours, the schooner William H. Clifford from Norfolk for Bangor, will finish her voyage in tow, minus a large part of her sails and rigging.

The schooner was at anchor in Vineyard Sound near Gayhead last night when she was run into by the schooner Hattie H. Barbour from St. John, N. B., for New York with a cargo of lumber. The Barbour's bowsprit and all her head gear were carried away and she was towed to New Bedford by the revenue cutter Gresham.

With her mizzen rigging and rail damaged, the William H. Clifford proceeded for this port under sail, but late this afternoon, off West Chop, she was struck by the five-masted schooner Margaret Haswell, losing her spanker boom, sail and rigging and sustaining other damage.

The Haswell, which was at anchor at the time, had her jibboom and head gear carried away. She is bound from Norfolk for Boston, and will tow to her destination.

WHO WILL REPAIR THE STREET?

Three Cornered Argument as to Repairs Needed on Nobles Island

The end of Market street on Nobles Island approaching the Portsmouth and Kittery bridge, is in bad shape. In fact, all the highway on the island has needed attention for many days. For several years it has been a question as to who should make the necessary repairs on the road in this section of the city. The railroad has been claiming that it is up to the public works and the public works department believe that the Boston and Maine is required to keep the highway in good order.

Now comes another side to the argument, making it a three cornered affair. The latest in connection with this mix up, is that the Portsmouth Bridge Company is responsible for the care of a portion of the thoroughfare between the toll house and the tracks of the Portsmouth and Dover railroad. It is time to find out just what is what, and who is who in this matter. The road is in an awful condition and cannot go much longer without a load or two of gravel or something else to put it in a half decent shape.

FIRE BELIEVED TO HAVE BEEN SET

Cottage Destroyed at Salisbury Beach Belonging to Henry Noyes of Hampstead

A cottage and barn at Salisbury Beach, belonging to Henry Noyes of Hampstead, N. H., was totally destroyed by fire early this morning. The buildings were situated at the Southend near the church. The house was unoccupied at the time, nobody having been on the premises since last Thursday, and it is the opinion of the beach residents that the building was set afire.

Mrs. Charland, who runs the Salisbury House, was the first person to notice the flames. She was awakened suddenly and was startled by a red glow shining through her chamber window. On arising and looking out she saw flames breaking out of a cottage down the beach. Raising her window she shouted "Fire," and in a few moments the few persons living near the Square were hurrying to the scene to assist in fighting the second fire at the beach this season.

Meanwhile Capt. Charles and his life savers had noticed the blaze and were making post haste to reach the fire.

Within a short time a crowd of seventy or eighty persons were busily engaged in beating out the flames and preventing a spread of the fire. A bucket brigade was formed, and was used to good effect, and with the help of the falling rain, adjoining property was saved with the exception of a cottage belonging to Mrs. Frothingham of Salisbury which was quite badly scorched.

The good work of Capt. Charles and his hardy men together with Chief of Police Beckman and others in all likelihood stayed a second conflagration as a stiff wind was blowing at the time. Capt. Charles and his men succeeded in breaking into nearby cottages and secured several pumps, working well and the captain says that if it hadn't been for this and the falling rain another serious fire would have resulted, as the burned property was situated in a thickly settled part of the beach.

The house and barn together with their contents were entirely destroyed.

Mrs. Charland stated that just before midnight she heard a carriage pass her hotel and shortly afterward an auto went by. Whether this had anything to do with the fire could not be learned. An investigation was begun this morning by the police in an endeavor to determine the origin of the fire.

LIME VESSEL IS TOTAL LOSS

On the Rocks Near Fishermen's Island—Other Ships in Collision.

The schooner Chester R. Lawrence of Rockport, Maine, is reported by her captain to be a total loss, between Fishermen's Island and Hyacinthe Lodge off Boothbay Harbor early this morning, when she ran ashore in a heavy sea and strong wind.

The crew took off the boats and after arriving at Boothbay summoned the revenue cutter Woodbury which left Portland at 10:30 for the scene of the wreck. The vessel has been engaged in the transportation of lime between Rockland and Boston for several years and was built 12 years ago at Essex, Mass. Her tonnage is 123, and she has been often seen in this port.

ENJOYABLE DANCING PARTY

Members of Class of 1912, Plymouth School Act as Hosts Last Evening.

The members of the class of 1912 of the Plymouth Business school, conducted a very pleasant dancing assembly in Freeman's annex on Friday evening.

There was a large floor attendance in spite of the inclement weather and the party was very successful, financially and socially.

Hobbs and Holt's orchestra furnished entertaining music and at intermission refreshments of beer and cakes were served.

The matrons were Miss Charlotte E. Wright, Mrs. R. S. Ryan, Mrs. P. J. Kelley and Mrs. E. H. Yeaton.

WILL TAKE STRAW VOTE

Progressive Club Intends to Put a Ticket in the Field.

The Progressive club will have a straw vote to indicate their choice for mayor at the coming city election at their next meeting. The Progressives put a ticket in the field last year when they were only a month old as a party. They are now a year old and fully confident they will go some at this election. They propose to give the voters of Portsmouth a chance to vote for some good people. This is their idea of a citizen ticket. Let each party put up their ticket and let the people choose the men they want to run the city for next year.

SAYS M'MULLIN HAS RESIGNED

From the Portland Division of the Boston & Maine Railroad.

Reports in railroad circles today have it that C. E. McMullin, superintendent of the Portland division of the Boston & Maine railroad, has resigned and that he is to be succeeded by John Houke, now assistant superintendent of the Southern division. Mr. McMullin has been with the Boston & Maine a little over a year, coming here from the west and succeeding William Merrill. For the past three months this change has been anticipated and the report also has it that it came on short notice as far as Mr. McMullin's resignation is concerned.

OBSEQUES

Mrs. Lucy M. Sins.

The funeral of Mrs. Lucy M. Sins, widow of John Sins, was held from her late home on Court street today at 11 a. m. Rev. Alfred Gooding officiating. Interment was in South cemetery under the direction of Undertaker O. W. Ham.

Dorothy Deisher Knit Close Form Skirt

Deisher Knit Skirts are thoroughly well made in every detail, from fabric to finish.

Deisher Knit Skirts are made from the best yarn obtainable, which makes them excellent wearing garments.

Deisher Knit Skirts are built on the improved Deisher plan—with "Hip-Fit, Yokes and Gored Seams."

Made in gray and flesh color. Price 50c, 69c and \$1.00.

For sale at Muslin Underwear Department.

Our Department of Women's Outer Garments receive many compliments on the character as well as extent of assortments. These comments express how well we have fulfilled our aim to provide styles distinctive from those shown in such endless similarity elsewhere. We buy from all good makers, making selections that result in a charming diversity of designs—even on the plainer tailored styles we insist on a grade of workmanship that gives a decidedly superior effect.

Women's and Small Ladies' Coats \$10.00 to \$35.00.

Children's sizes, 6 to 14 years, \$3.50 to \$7.98.

HANDSOME SUITS FOR WOMEN—Here is such a collection as makes a representative exhibition of what American manufacturers have made this season in Suits for Women. The prices range from \$10.00 to \$30.00. Call and look them over.

REDFERN CUSTOMERS ARE PERMANENT CUSTOMERS.

L. E. Staples, Market St.

COCHRAN WILL BUILD DEFENDER

Yachtsman Gives Order to Designers to Construct Boat.

New York, Oct. 25.—Alexander Smith Cochran, of Yonkers, a member of the New York Yacht club, for nine years, has ordered a 75-foot sloop yacht for the defence of America's cup, it has been learned. William Gardner, the designer of many fast racing yachts, has been commissioned by Mr. Cochran to design the new boat with the stipulation that he shall not accept an order that any other yachtsman or syndicate to design another sloop for the same purpose. No other restrictions have been placed upon Mr. Gardner, who is to produce the fastest yacht possible under the present rule of the New York Yacht club. It has not been announced who the holder of the cup will be.

Mr. Cochran, who is to bear the entire expense of the building and racing of the yacht, is best known to the yachtsmen and to the public through his phenomenal success abroad with the schooner yacht Westward, which was designed and built for him by the Harshoffs in 1911. She crossed the Atlantic that year and defeated all comers in German and British waters, winning among other prizes the Kaiser's cup at Cowes. The schooner was afterward sold to a German yachtsman and Mr. Cochran has not owned a yacht since.

IN THE MOVING PICTURE WORLD

Edison Players Return from Maine.

Mary Fuller, Augustus Phillips, Helen Milford, Edna MacLeod, Frank McDermott, John Burroughs, Dick Neill and Harry Bennett, who have been spending the summer in Maine under the direction of Walter Edwin, have returned to New York after a most successful trip. The number of the departure is probably unparalleled in the history of any company of players. When the people of Bangor, the town in which they were playing, learned that the Edison players intended to leave, they planned a huge reception and dance in their honor but Walter Edwin respectfully declined that the players could not possibly attend. Nothing daunted, the entire town turned out with a brass band, the school children carried small flags with the legend "Good-bye Mary" and Judge J. B. Black, one of the leading citizens of Bangor, paid a glowing tribute to the Edison players in which Walter Edwin replied very graciously. Judge Black concluded his complimentary remarks by presenting Mary Fuller with a bound edition of the history of the 26th Maine Regiment, of which he was a member.

Mary Fuller Has Bad Parting With Wilfred.

On the morning of her departure from Maine, Mary Fuller quietly slipped away from the rest of the players and walked slowly out to the little pen which she had especially arranged for Wilfred, her pet pig. There was the handsome wretch sitting well, as though he had never broken a pig's heart. He had said to his everlasting credit that when Mary called him he abandoned his delectable meal, rushed over to her with squeals of joy and was gathered up in her arms. Here Mary stood until Augustus Phillips came out in search of her. Phillips saw that there were tears in Mary's eyes and, when questioned about it, Mary simply acquiesced a lofty expression and remarks that she has "nothing to say," except that she wishes some people were as nice as

Wilfred, thereupon Phillips beats a hasty retreat.

Dick Neill Tries a New One.

Dick Neill has once again turned the trick as the original nine lived member of the Edison Company. He was one of the players in Maine, and, having finished up two days before the others, he decided to make a bolt for dear old Broadway. One of the peculiarities of Searsport, where the Company was located, is that you have to ride to Belfast to get a train. Dick had sixteen minutes in which to make a nine-mile run to Belfast—all of which sounds easy until you have some of those Maine roads. Dick was in a very tight position that he had to make a dash for it, and he did so. He got beyond the chauffeur's control, swerved into a gully and turned over. Dick leaped out as it struck the gully and landed clear of the machine. The chauffeur, however, was pinned under the car, but was saved from serious injury by the steering wheel which held most of the weight and by the gully over which the machine was partly bridged. With the help of farmers and a force of police Dick released the chauffeur. Dick says that after his accident in "The Charge of the Light Brigade" and his numerous other escapades, he still figures that he has three and a half lives left.

Brower a Victim.

After all his investigations against the automobile, and the many amusing rumors he has made to various owners of said automobiles, Robert Brower has at last fallen a victim to the auto bug. Mr. Brower blames the whole thing on Charlie Seay, who insisted upon taking him out in his new machine. The well known Edison player maintains that his objection to the automobile was founded simply on what the other fellow might do. He has implicit faith in his ability to handle a machine, but was unable to keep the other fellow from running into him. He solved this problem, however, and now goes forth in his new machine without fear of anyone. On the back of it is a red placard reading "Dynamite."

Edison to Start New Series.

Edison is shortly to begin releasing a new series of detective stories under the title "The Chronicle of Clock." They will be intensely dramatic mystery tales, founded on the stories by Thomas W. Hough, which have been all the rage in England. They will be published in this country simultaneously with the film releases by the Short Story Magazine. Each film will be released on the last Tuesday of the month, beginning Nov. 25. Ben Wilson, the popular player, will appear in the title role.

Has a Sense of Humor.

After Washington's crime of humor was tickled by a remark which was passed in the presence of Dan Mason not long ago. Miss Washington was playing the part of an angry woman who was trying to get aboard a surface car. Four cars whizzed by as she tried to get aboard and as the fifth approached, she stood in the middle of the track and refused to move until the car came to a stop only a foot from her. Then she climbed aboard and rode majestically on. Mason was standing on the curb watching the performance and near him were two women, one of whom, evidently a visitor, remarked "Well, that's the first intoxicated woman I've seen since I came to New York."

OUR RADIUM RESOURCES

Philadelphia, Pa., Oct. 25.—At the evening session of the 84th Annual Convention of the American Mining Congress, Dr. Charles L. Parsons, chief of the Division of Mineral Technology of the United States Bureau of Mines, in a paper on "Our Radium Resources," announced the incorporation of the National Radium Institute and a co-operative agreement between the institute and the Bureau of Mines. According to Dr. Parsons, a preliminary statement issued by the Bureau of Mines last April pointed out that three times as much radium was be-

SPEEDY PIGSKIN CHASERS ON NAVY'S STRONG LEFT WING

Left Halfback Leonard and Left Tackle Ralston are powerful units on the splendid left wing of the United States Naval academy's football team. With them on their side of center are

ing made from the carnallite ore of Colorado and Utah as from all other sources of radium in the world; and this ore was bought by European manufacturers at prices uncommensurate with its radium value, while much ore of lower grade was being discarded and wasted. The publication of this statement, Dr. Parsons stated, has already increased the selling price of American carnallite ores over 20 per cent, and has made ore of much lower grade marketable, with the result that many old dumps are being sold for the recovery of material that was then regarded as waste.

The popular belief that the chief source of radium is the mineral pitchblende, especially that from mines at Joachimsthal, Bohemia, which are under the control of the Austrian government, is inaccurate. Some pitchblende has been produced from mines in Utah County, Colo., and another radium-bearing mineral, has been found in South Australia and in Portugal, but carnallite, the most important ore of radium is found outside of the United States, only in South Australia and Russian Turkestan.

The Paradox Valley region of Colorado is the richest radium-bearing field in the world. Carnallite is a lemon-yellow mineral containing the rare metals uranium and vanadium, and in Colorado and Utah is usually found in pockets in sandstone. It can be told by its color and appearance, and especially by its being radioactive. If a photographic plate be wrapped in several thicknesses of paper, and a key or other metallic object placed on the paper, and two or three ounces of carnallite be suspended above the whole in a light-tight box, and then, after three or four days, the plate be developed, an image of the key or other object will be found on the plate. The radium is associated with the uranium in the ore, and can be separated from the vanadium, uranium, and other metals present by chemical treatment.

The price of radium is about \$120 per milligram of radium metal, which is equivalent to approximately \$30,000 per gram of radium chloride, or \$70,000 per gram of anhydrous radium bromide, the forms in which radium is sold.

The total quantity of the ore in the Colorado and Utah region, because of its pocket nature, can not be estimated with any accuracy, but although the money value of the ore mined in a single year will never approach that of this country's output of several of the common metals, yet the value to the public of these deposits is not to be measured in dollars and cents. Developments in the application of radium to medicine are coming fast, and with the production of a sufficient quantity of radium in this country, cures may be effected that have been impossible with the smaller amounts heretofore available to physicians. It is doubtful if, at present, there is in the hands of the medical profession of America more than a single gram of this rare element, and the results of investigations soon to be published will show that the concentrated action of rays from several hundred milligrams of the element arrest certain forms of cancer and other malignant growths when smaller quantities are without beneficial effect.

As regards the National Radium

Institute, which has just been incorporated in Delaware with Dr. Howard A. Kelley, James Douglas, Dr. Curtis M. Burnham, and Archibald Douglas as directors, Dr. Parsons stated that the institute has formed a co-operative agreement with the Bureau of Mines whereby the bureau obtains the opportunity of a scientific and technologic study of the mining and concentrating of carnallite ores and of the most efficient methods of obtaining radium, vanadium, and uranium therefrom, with a view to increased efficiency of production and the prevention of waste. The institute has obtained the right to mine 27 claims in the Paradox Valley, including some of the best mines in this richest radium-bearing region of the world, has already procured nearly 100 tons of carnallite, and is to begin work in an experimental plant, to be erected in Colorado, using entirely new methods developed by the Bureau of Mines. The institute, which is supplied with sufficient funds to carry out its purpose, has been formed with the special idea of procuring enough radium to conduct experiments in radium therapy, especially the curing of cancer, and to investigate the physical and chemical effects of radium rays.

AT THE RIVER

Flow they pool, flow they west,
Far across earth's thrilling breast,
Deep, shallow, low, or fleet,
At the sea all rivers meet!

Come they from whatever source,
Flow they by whatever course,
When the journey is complete,
At the sea all rivers meet!

Of divergent origin,
Winding, gliding, out and in,
Till with mystery replete,
At the sea all rivers meet!

By a fixed certain rule,
Never taught in any school,
Still unerring, just complete,
At the sea, all rivers meet!

Never one of all the host,
Is there swallowed up and lost,
Till the vast receptive sea
Borrow's its identity.

Human hand may check the tide,
Human toll may set aside;
Still the adage I repeat,
At the sea all rivers meet.

And because it is His will
Thou shalt obey His law fulfill,
Mingling, merging, slow or fleet,
At the sea all rivers meet.

And the rule, if I am wise,
Not the less to faith applies,
And that creed, tho' different,
Are related in intent.

Toward a single goal they grow,
Even as the rivers flow;
And in peace as deep as sweet,
At the sea all rivers meet.

ARTHUR GOODENOUGH.

HOPE OF FINDING MORE ABANDONED

(Continued from Page 1.)

the bodies were found.

At the news of the added deaths, the men who had been doing the rescue work refused to go back into the mine but their places were taken by men from the rescue car which had been rushed from the Kansas coal fields. The rescue work is going forward slowly under the leadership of J. C. Roberts.

POULIOS DEFEATED OLSEN IN TAME MATCH

A small crowd saw Jim Poulos, the Manchester Greek defeat Bull Olson in straight falls at Freeman's Hall on Friday evening. The first fall went to the Greek after 45 minutes of work in which Poulos did not appear to exert himself, and neither showed any wonderful science. The second fall lasted but ten minutes, Poulos making easy meat of the misnamed "Bull." In the preliminaries Young Sampson was scheduled to wrestle Fred Reckendorf, the local blacksmith, but he side stepped and an obliging sailor took his place, and Young Sampson won the falls.

PORTSMOUTH THEATRE PROGRAMME

For Friday and Saturday.

"The Smuggler."—Tatue.

A father, wishing to give his daughter a good education, sends her to school and then disappears. The girl's tuition reaches the school regularly, but the money is earned from smuggling. A fine drama of the deep.

"Never Known to Smile."

"Scanting a Terrible Crime."

Two very funny Biograph comedies on the same reel.

ACT—Paula Reeves, Singing.

"Winning His Wife"—Lubin.

Against the advice of his friends he marries a country girl. She falls in with society so much, that she has little time for her husband.

ACT—O'Neill Trio—Singing.

"His Secret"—Biograph.

He enters a house to steal, but finding his wife in there tending a sick child, he slips out again. They were a couple in need of money. They both got work, so he didn't have to steal after the maid. A very strong drama.

"The Capture of Bad Brown"—Bell.

A vigorous bit of Westernism, with picturesque frontier types and inspiring out-of-door atmosphere, that invests a live and interesting story with fun and fancy to point a moral.

Matinee, 2.15; Evening 7.00. Saturday Evening 6.45.

OFFICERS ELECTED

At 10th Annual Convention of New Hampshire Society.

At the 10th annual convention of the New Hampshire Horticultural Society held at Laconia, the following officers were elected:

C. W. Barker, Exeter, president; J. T. Harvey, Pittsfield, vice president; Stanley K. Lovell, Goffstown, secretary-treasurer; J. H. Gourley of Durham, E. B. Parker of Wilton and F. A. Badger of Belmont, executive committee.

Members of board of county organizers are George E. Gowen, Stratford; F. A. Badger, Belmont; D. R. Slade, Center Harbor; A. J. Durgin, Lee; Robert B. Faulkner, Keene; O. M. Pratt, Holderness; J. A. Costello, Lancaster; E. N. Sawyer, Salisbury; E. B. Parker, Wilton and Herbert W. Holmes, Charlestown.

BOWLING

Billy Mitchell won the roll-off at the Arcade Alley's on Friday evening with 321; just missing out Jack Renner who was but one pin behind. Both were hitting the pins in fine shape. Mitchell opened with a poor string of 78, but came back with the high string of the night, 139, and his third string was 104. Renner's high string was 126.

The scores:

Mitchell	78	139	104—321
Renner	91	126	103—320
Kingsbury	95	100	85—281
White	98	81	100—279
Fernald	90	89	93—272
Smith	90	86	95—272
Robbins	77	109	92—278
R Adams	81	80	102—263
Burch	58	94	85—237
J. Adams	88	88	83—259
Eastman	80	93	85—258
Haskell	79	83	81—243
Sabins	78	87	86—251
Ruby	75	84	69—228
Dodge	71	70	73—214

Universalist Church.

ALFALFA

You Can Raise It--You Should Raise It

By WILLIAM O. WING.

There is not a farm that does not need alfalfa. There is not a farm that cannot grow alfalfa. Alfalfa is growing on the sands of Florida, on the red clays of Georgia, on nearly all the soils of Virginia, splendidly on different soil types of New Jersey, Pennsylvania, New York and New England.

There remain no mysteries, no secrets, about alfalfa growing. All it asks is that the land be well drained, that it be fertile and with enough lime in it, that it have inoculation from another alfalfa field and have the seed. Given these things and alfalfa is as vigorous as a weed anywhere in America. True, it will not grow in wet land nor in cold, poor, land nor in sour, unlimed soil; but, now, no one with sense sows it in such situations.

What Alfalfa will do for the small farmer is this: It makes a feed as rich as oats for feeding his dairy cows or his working horses. It makes hens lay. It pushes the pigs forward cheaply. One can get five tons of alfalfa from one acre of good land. Five tons of good alfalfa hay are about equal in feeding value of 300 bushels of oats.

It would take five acres of your best land to make 300 bushels of oats, and they would need to be sown every year, whereas alfalfa once sown will come again and again for a term of years. Then oats or corn will drain the land of its fertility; alfalfa will fill it with nitrogen. If care is taken to keep the land stored with the mineral elements of fertility, its phosphorus, lime and potash, alfalfa will do the rest, for it gets its nitrogen from the air.

The large farm should have alfalfa, but this small farm must have it because of the need to make every acre do its best. Five tons of alfalfa hay may be worth to the farmer \$125 or even more money, for alfalfa hay is a little richer than wheat bran in feeding value and it will make a great saving when the farmer ceases to buy bran and grows his own supplies of protein.

From the farm itself should spring up the feed for the animals of the farm. Alfalfa and corn will make milk and beef and pork without reliance on any other supplies than those which the farm affords. It is a surer, crop than any other except the wild, native grasses upon the farm.

The village should have his plot of alfalfa for his fowls; but to let them run upon it steadily, for that might be injurious to the alfalfa; but to cut for them and for winter feeding.

Alfalfa makes cheap and abundant eggs and fowls of the finest flavor.

TO CONSUMER DIRECT.

Keeping What the Middleman Generally Gets--The Lion's Share.

By E. K. PARKINSON.

Farm Management Expert.

Growers of produce who are up and doing are never satisfied with indirect sales.

On Long Island, thirty miles from New York, is a farm of twenty-five acres. Ten years ago it could have been purchased for a few thousand dollars. Within its bounds were an old fashioned house, a barn, and, best of all, a supply of fine water. To this neglected spot came a woman looking for a bargain. Possession soon was in the newcomer; at the time, in business in New York, a desire to turn her investment to some practical account.

After thinking the matter over she decided to develop the garden, devoting it to vegetables and small fruits and also to raise chickens for broilers and roasters. The first year the garden supplied an abundance for the household and for guests.

Encouraged by the first year's success and it should be added that, as the owner's business required her to be in Florida three months every winter, day old chicks were purchased instead of fowls for breeding. A market grower was engaged, under his management the garden produced prodigiously, and the marketing problem became pressing. The distance to New

York was too great for a market wagon.

While these things were being considered a friend expressed a desire to have vegetables, berries and a pair of broilers boxed and sent to her town house twice a week. This suggestion proved the turning point. Hampers were procured large enough to hold a daily supply of vegetables, fruits and poultry, and little by little a splendid business was built up, so that now between fifteen and twenty hampers are packed and sent to New York every week day from May to November.

The price of these hampers is \$1, poultry being extra, and the consumer pays all transportation charges. Recently this woman has found it expedient to drop her business in Florida and has begun starting her seeds in hotbeds and coldframes, thus extending her season. This success is due to the owner's initiative in striking out along new lines and selling directly to the consumer.

Not everybody can find such an opportunity or embrace it when found, but all may be on the lookout for the opportunity to establish the direct to you method of selling, which eliminates the middleman and his charges.

BUSINESS DAIRY HERD.

If the Herd is to Keep You, Cut Out the Cows You Have to Keep.

By F. B. MUNFORD.

Dean and Director, University of Mass. The farmer is a manufacturer; he also produces his own raw material. As in the case of the manufacturer, he invests capital, employs skilled labor and makes the largest possible use of machines by which the raw products of the soil are made into more valuable products required for the food and pleasure of mankind.

The profits of the manufacturer very largely depend upon the kind of machine used in the manufacturing processes.

In the manufacturing processes conducted on the farm the animal is the machine, and like the manufacturer, the profits to the farmer depend largely upon the efficiency of the animal machine. There are some horses that will eat a bushel of oats and trot a mile in two minutes. There are other horses that when fed the same kind and amount of oats, hitched to the same sulky, driven by the same driver over the same track, will do well if the trot a mile in four minutes. There is no difference in the oats nor in the driver or the track. It is altogether due to the difference in the efficiency of the two animal machines.

There are dairy cows which when fed a certain amount of food under certain conditions will produce 125 pounds of butter in a year. There are other cows fed the same food for the same length of time that will as easily produce 250 pounds of butter in a year. The profits from the efficient cow are often ten times greater than the profits from the inferior animal. In fact, the inferior animal is generally fed at a loss.

If it is true that one cow can be so much more profitable than another cow the question is: How can we secure the profitable cows? There is only one sure way, and that is by actual test. In any herd of cows the milk of each cow should be weighed separately and a record kept. It will be found that on the same food some cows produce double the milk that is secured from others. But the investigation should be more thorough.

There is a very great difference in the richness of the milk from different cows. The per cent of fat in milk can easily be determined, thanks to the invention of the milk tester. No dairyman can successfully prosecute his business without a pair of scales and a milk tester. With these two appliances and with a good system of record it is possible to make over an unprofitable money losing herd of cows into a money making herd.

HOUSE POULTRY RIGHT.

Good Food and Care Are Wanted Unless Your Hens Have a Good House.

By D. J. LAMBERT.

Poultry Instructor, N. J. State College.

Poultry keepers of today know that it pays to give laying hens a clean, dry, bright sunny house in which to live, especially during cold weather.

Hen houses for winter layers should be built as snug as possible on the three sides, north, east, and west, and with an absolutely tight roof. The south side should be almost entirely open to the sun and air. Muslin curtains may be provided so as to partly close the front on very cold nights or during stormy weather. There is no danger from exposure, in open front house during the day or night provided that all openings are on one side, and below a horizontal plane of the roof. The open front must always face the south or southeast.

All poultry houses should be located where they will get the morning sun and should be elevated so that the rain and surface water will drain away from them.

An old style hen house can easily be remedied by tearing out the south front and leaving it open for sun and air. If the roof leaks cover with roofing paper. Both ends and back of the house should also be wind proof. If the house is more than eight feet high it should be sealed up about seven feet from the floor. Allow from three to four square feet of floor space for each hen.

September is the best month in all the year for the annual housecleaning. Remove all fixtures such as roosts, dropped boards, and nests. Brush the coverts and dust from the walls and ceilings and remove the litter and dirt from the floors. Where floors are of earth remove as much as appears to be mixed with dirt or excrement.

Then with a spray pump or a brush apply lime wash to every part of the building. This lime wash is made by slacking rock lime with hot water and thinning to the consistency of skim milk. If 2 per cent of carbolic acid is added the wash will be more effective as a disinfectant.

The roosts should be painted with kerosene, news thoroughly cleaned and tobacco dust or stems added in the straw or sawdust nesting material. Cover the floor again with clean sand or fine gravel to the depth of four or six inches. If not too coarse this will provide a dust bath for the fowls. Where dropping boards are used under the roosts they help to keep the floor clean and facilitate the work of removing the manure.

ANOTHER CLEAN SWEEP AT THE BIG HAGERSTOWN, MD. FAIR.

Eight thousand of America's finest chickens were bidding for prizes at the Great Hagerstown Poultry Show, which wound up in a blaze of glory last Friday night. These birds represented the pride and cream of America's best breeders, all under one roof, seeking the coveted Blue Ribbon and valuable cash prizes.

Unfortunately only a few of the eight thousand birds on display could obtain a prize, as competition among the different breeds was a keen as a razor edge.

One of the largest winners of this wonderful show was made by the Pratt Experiment Station at Morton, Pa. Fresh from victory at Allentown a few weeks before the Pratt birds made another magnificent showing at Hagerstown. They made a clean sweep of their wonderful string of Rose Comb Black Minorcas, winning every first prize there. Not satisfied with this prize, the birds from the Pratt Station also captured the first prize for the finest pen of White Plymouth Rocks; first prize on a beautiful pen of White Wyandottes; first prize for the best young Pekin Drake and for the best young Pekin Duck.

This marvelous showing of birds from the Pratt Poultry Co.'s Poultry Farm demonstrates their ability to successfully breed, hatch, rear and feed their stock so as to compete with the world's best in poultrydom.

Through the courtesy of the Pratt Poultry Co., we are pleased to announce to our readers that they may feel at perfect liberty to write the above Company about any subject relating to poultry, as a complete staff of poultry experts are employed, whose sole duty is to answer questions and solve knotty chicken problems.

FUNERAL NOTICE

Funeral services of Frank W. Ham will be held at the home, No. 80 Porter street, Sunday afternoon at 3 o'clock. Friends invited.

At The Churches

The Salvation Army
302 State Street
Officer in charge, Captain and Mrs. Charles Alley.
Sunday afternoon at 3 p. m.--Praise meeting.
Sunday evening 7.30, Salvation meeting.
Meetings each night in the week excepting Tuesday, at 8 p. m.
All are welcome.

People's Baptist Church
Rev. John L. Davis, pastor.
11.00 p. m.--Sermon by Minister Davis. Subject: "An Appeal to God."
12.00--Noon Sunday school in charge of Superintendent H. B. Burlon.
7.15 p. m.--Christian Endeavor, William Pattillo, President.
8.00 p. m.--Third sermon in the series on the "Gospel of John." Subject, "The New Birth."
Seats are free and all are welcome.

Middle Street Baptist Church
Morning worship at 10.30 with preaching by the pastor upon "An Ideal Man."
Sunday school at noon in the chapel.

The Men's Class holds a short session in the Annex then holds services at the County Jail.
Evening service at 7.30. Praise service in which hymns selected by favorite vote will be sung.
King's Daughters meet Monday evening at 7.30 in the chapel.
Y. P. S. C. E. meets Tuesday evening at 7.45 in the Guild Room.
Roll call service of the church beginning at 6.30 Thursday evening.

Court Street Christian Church
Rev. Percy Warren Caswell, pastor.
Morning worship with sermon of the pastor at 10.30. Subject, "The Father's Mercy."
Bible school session at 11.45 o'clock.
Opward Class meets at the same hour.

Praise and social service at 7.30. Short talk by pastor. Subject, "Remember Lot's Wife."
Church prayer meeting Wednesday evening at 7.30 o'clock.
Hallow-e'en Social Friday evening in the church vestry under the auspices of the Four Leaf Clover Society.

Pearl Street Free Baptist Church
Rev. Edwin P. Moulton, pastor.
10.30--Preaching by the pastor.
11.45--Bible school.
7.30--Song service and short sermon by the pastor.

The Woman's Missionary Society will meet in the vestry Wednesday at 8 p. m.
Dr. Mary Batchelder for many years missionary in the Beigal Mission field, India, will address the meeting. All interested, both men and women are invited to be present.
Mid-week prayer meeting Friday evening at 7.30.

First Church of Christ, Scientist, No. 2 Market Street
Services Sunday morning at 10.45 and Wednesday evening at 7.45. All are welcome.
Subject for October 26th, "Probation After Death."

Sunday school at 11.00.
A free reading room is maintained at the same address where Christian Science Literature may be read or procured. Open to the public daily, except Sundays and holidays from 2 to 4 p. m.

First Methodist Episcopal Church
L. L. Galtier, pastor.
Sunday morning at 10.30, preaching by Rev. R. M. Huse.
Sunday school at 12.00 o'clock.
Epworth League at 8.30.
Preaching service at 7.30 by Rev. R. H. Huse.

During next week preaching services will be held every evening. Rev. Mr. Huse of Dover will be the preacher.

Unitarian Church
Sunday Oct. 26.

Morning service at 10.30. Sermon by Rev. Alfred Gooding.
Sunday school in chapel on Court street at 12.00.
The choir will render the following

musical numbers:
"We Praise Thee O God"--Buck.
"My God I Thank Thee"--Barnby.
"Bless Ye the Lord"--Perry.

St. John's Church
Twenty-third Sunday after Trinity.
Holy Communion in chapel at 8.00 a. m.

Morning prayer 10.30 a. m. in the church.
Sermon by the rector Rev. Harold M. Polson.
Kindergarten and church school will be omitted Sunday, October 26th. It is hoped that regular sessions will be resumed Sunday, November 2nd.
Feast of St. Simeon and St. Jude, Tuesday October, 28.
Holy Communion 10.30 a. m. in the chapel.
Evening prayer. In the chapel at 5.00 p. m.

Advent Church
Devotional services at 10.30 a. m.
Sunday school at 12.00 p. m.
Preaching at 2.30 p. m.
Preaching at 2.30 p. m. by Rev. W. P. Puttie of Meredith, N. H.
Children's meeting at 5.00 p. m.
Loyal Workers meeting at 8.00 p. m.
Praise services at 7.15 followed by preaching at 7.30 p. m. by the speaker of the afternoon.

Christ Church
Twenty-third Sunday after Trinity.
Motto for the day from the Collect, "God, Our Refuge and Strength."
Services and Meetings
Holy Communion, 10.00 a. m.
Holy Eucharist and sermon 10.30 a. m.

Junior's mass meeting, 12.00 m.
Choral Evensong, 4.30 p. m.
Brotherhood mass meeting 7.30 p. m.
The subject of the meeting in the interest of the Juniors at 12 m will be "What the Brotherhood does for the Boys." All are welcome to attend this meeting. The boys are especially invited.

The meeting at 7.30 p. m. will be a Brotherhood After-Convention meeting. The delegates from Christ Church will give their impressions of the New York Convention. Several visiting Brotherhood Workers will be present. Mr. John W. Locke of New York, a member of the National Council of the Brotherhood, and Mr. G. H. Randall, associate secretary of the Brotherhood and others. All are welcome to come to this meeting. The men of Portsmouth are especially invited.

Throughout the meeting Brotherhood hymns will be sung. At this meeting and at the meeting at 12 o'clock, Master Elvin R. Newton, Director of the church Junior Chapter will deliver the address made by him in Carnegie Hall was so favorable received.

Music at 10.30 a. m.
Processional, 516 Sullivan
Kyrie Plalmos

Service and address, Thursday, 3.30 p. m.
Service, Friday evening at 7.30.
Choir rehearsal, full choir, Friday evening.

J. B. S. A.

At G. A. R. Hall, Portsmouth, Sunday, Oct. 26, 3 p. m.
Free lecture, under the auspices of the International Bible Students Association. Subject, "The Atonement."

by Eugene T. Lage. Undenominational. All welcome. No collection.

North Congregational Church
Morning worship at 10.30; ten o'clock with preaching by the pastor.
Vesper service in the church at five o'clock.

Session of the Sunday school in the chapel at the noon hour.
Young Peoples' meeting in the Parish House at ten minutes past six o'clock.

MANY USES FOR BIRCH ARE RECORDED

From furnishing material for a canoe in which to hunt whales some hundred odd years ago to supplying New England factories of today with 14,000 cords of wood annually for stumps and shanks is, according to the department of agriculture, only part of the services the birch tree has rendered and is rendering the people of America.

Sir Alexander Mackenzie, the department tells us in a bulletin just issued on the uses of birch, hunted whales in a birch bark canoe. The animals were found at the mouth of the Mackenzie river. He failed to strike the game, and concluded that it was probably for the best. While the canoes are frail, it is pointed out that the bark of which they are made resists decay longer than any other part of the tree.

It would be difficult, the department goes on to say, to estimate the value of the service of the birch bark canoe in the discovery, exploration, development, and settlement of the northern part of this continent. From the Arctic Circle to the Great Lakes, and southward, for a century and a half, that light but exceedingly strong and serviceable vessel threaded the lakes and rivers, bearing trade and carrying civilization where no other boat could go. The French explorers and missionaries made journeys of hundreds of miles in these canoes, often carrying cargoes which would seem beyond the capacity of such frail vessels.

The range of uses to which birch wood is put is surprisingly large. According to the department, the article into which it gives range from church pews to kitchen tables, and from organ pipes to newel posts. It may have our first sleep in a birch cradle and our last in a birch coffin. The spoons on which we get our cotton and silk thread are birch spoons, and the laths on which our shoes are made are likely to be birch laths. The largest of the spoons hold 32,000 yards, the smallest 20 yards. The wood's beauty, strength, rigidity make it prominent as a material for musical instruments, and the same qualities bring it into extensive use for flooring.

Many people have an idea that shoe pegs have nearly passed out of use, but the amount of birch previously mentioned as made into pegs, and shanks yearly in New England seems to disprove this notion. Birch, the department says, is often put on the market in imitation of other woods, and we may open many a door, sit on many a chair, and write on many a desk which we imagine to be mahogany, but which is really stained to resemble the genuine article.

King species of birch grow in the United States, but sweet, yellow, paper and river birch are those most used. About 45,000,000 board feet of the wood finds its way to the market yearly. Paper birch is one of the few American species with a hold on the forest stronger than it had when America was discovered. Large tracts are now covered with this birch where there was little of it a century ago. It comes in after, fire, and some tracts it has taken possession of cover hundreds of square miles.

OBSEQUES

Mrs. Susie E. Walker
Funeral services of Mrs. Susie E. Walker were held at the Christian church, Rye Center Friday afternoon at 3 o'clock; a large attendance of sorrowing friends and relatives being present. Rev. J. R. Fenwick officiated.

Interment took place in Congregational cemetery under the direction of H. W. Nickerson. The pall-bearers were Robert Rand, Howard Brown, Walter Marston, Shirley Brown.

For a mild, easy action of the bowels, try Doan's Regulax, a modern laxative, 25c at all stores.

Editorial 28 Business 37

Portsmouth, N. H., Saturday, October 25, 1913.

New Hampshire Not So Slow After All.

Our neighbors across the line in Massachusetts, especially some of the residents of Boston, are inclined to refer to the people of the good old Granite State as being slow. We take exceptions in behalf of the people of the state in general who are noted for their thrift and general energy. In these days of the automobile, aeroplanes and fast trains, it, however, seems quite strange that the people of a state like Massachusetts, claiming to be so up-to-date, should use oxen to haul the Eaton jury. In this section of "down East," as some of the Bostonians are wont to designate New Hampshire, a yoke of oxen is very seldom seen in service, much less used as a conveyance for a body of men as was in the case of progressive Massachusetts.

Take Things as You Find Them.

Whatever you do never set yourself up for a critic. We don't mean a newspaper critic, but in private life, in the domestic circle, in society. It will not do any good and it will do you harm, if you mind being called disagreeable. If you don't like anyone's nose or if anyone's manners don't please you, remember your own. People are not all created to suit one's taste. Take things as you find them unless you can alter them. Even a dinner after it is swallowed can't be made any better. Continual fault finding, continual criticism of the speech of this one or the conduct of that one; the dress of one, or the opinion of the other will make you as well as your home unhappy. If you are never pleased with anyone, no one will be pleased with you.

Teachers' Pensions.

On the continent the benefits of teachers' pensions have often been extended to include widows and orphans of teachers. In Scotland a comprehensive system has been developed, based on scientific insurance principles. Whether pensions shall be supported in whole or in part by the State, or whether they shall be financed entirely by the teachers themselves, is a problem that has been solved differently in different countries. In Germany the State finances the entire plan, the teachers making no contributions whatsoever. In France the teachers are heavily assessed to keep the pension system going. In the United States the tendency is to ask small contributions from the teachers.—New Bedford Mercury.

In the Interest of Education.

The postal department would do well to take into account the case of those who are paying the present third class rates on their reading material. There are few articles sent that are more easily handled, that are not likely to cause trouble to the postal clerks or to damage other packages. If other parcels can be carried at low rates, there seems no reason for making an exception of books. And it would be in the interest of education to afford the cheapest and best facilities for the distribution of literature.

Civic Work by the Schools.

The commissioner of public schools of Rhode Island has issued through the department of education, some circulars in regard to the civic work done by the schools. The Cumberland Civic Guards were organized three years ago, and each child takes the following pledge: "I promise to do all I can to promote cleanliness, beauty, and order in our town." Civic guards are being formed in other school districts of the state and other states. Why not here?

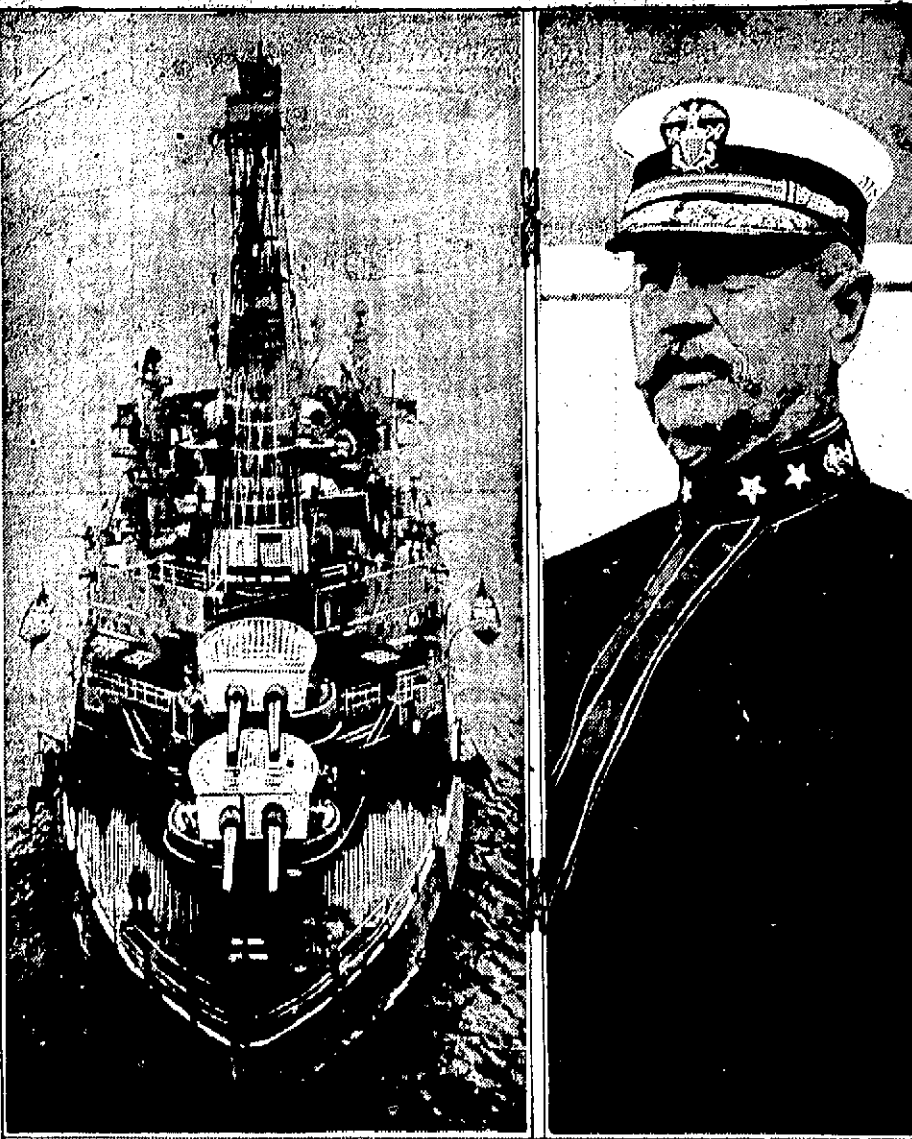

Stick to the Text.

Candidates for the governorship are advised to stick to their texts. Some of them send out advance copies of their speeches to be printed in the newspapers and then talk something else. That is not fair to the papers or the public. In the old days, beginning with William E. Russell's time, the politicians spoke "as advertised," and their utterances followed closely the galley proofs. That was the proper way, and present-day candidates are admonished to observe it.—Lowell Courier-Citizen

Nothing But a Majority.

In the way that the income tax conversation proceeded in the United States Senate perhaps as important a point as was made is this—that the security of the poorer man in his public and private rights depends upon the security of the richer man in his public and private rights, for when justice and equality are thrown overboard, and it becomes nothing but a question of majority, no security will be left for anybody.

Flagship and Commander of United States Fleet Designed to "Educate" Foreign Nations on Cruise.

Photos by American Press Association.

Unusual interest is being manifested in official circles at Washington in the cruise of the Atlantic fleet battleship in the Mediterranean. The cruise is a "courtesy trip," but it is being pointed out here that incidentally it will direct the attention of the world to two important facts. One is that American battleships in actual service are prepared to hold their own against any navy afloat except that of Great Britain, and that because of its geographical advantages the United States can dispatch its Dreadnoughts 3,000 miles from home shores without uneasiness. In addition to their present crews, the battleships carry 1,500 men from the naval training staffs on the great lakes. One assignment of provisions for the ship includes 40,000 pounds of fresh beef and 120,000 dozen of fresh eggs. For the Mediterranean trip the battleships divided into three divisions, commanded by Rear Admirals Cameron Melt, Winslow, Frank E. Fletcher and Francis B. Bontly. Rear Admiral Charles J. Badger is in command of the entire fleet of nine battleships, and his flagship is the Wyoming. The Wyoming is shown, together with Rear Admiral Badger, in the accompanying illustration.

THE HORSE'S VACATION.

I'm going to have a vacation;
I don't know where it will be;
I know it's away from the city,
And that is enough for me.

They say I shall roam in pastures,
And roll in the fresh green grass,
Where neither street cars nor autos
Can terrify me as they pass.

I'm going to leave the harness;
I'm going to enjoy and run;
Perhaps I shall have companions
To join with me in my fun.

I shall dip my nose in the water
Of a brook that stings the way
Through this wonderful sweet, green
pasture.

Where I for a time shall stay.

There are trees with wide-spreading
branches,
To shelter me from the sun;
Rushing that I can nuzzle,
When weary of frolic and fun.

I shall sleep at night in the open,
With stars shining over my head;
The air blowing fresh in my nostrils,
And the soft grass for my bed.

Good-by to the hard city pavements,
Where the scorching sun beats
down;
To feed hay and stuffy stable—
I'm going away from town.

I'm going to have a vacation,
The first one I've ever had,
Out in the country I'm going,
Do you wonder that I'm glad?

—Helen M. Atchard-Sun.

IN THE LITERARY WORLD

The November Woman's Home Companion.

In the November Woman's Home Companion the campaign for "Better Babies" is still further carried forward by the establishment of a special department for "Better Babies" in which a series of articles is to be published containing practical suggestions to mothers for the care of children. These articles are to be contributed by great authorities on the subject. The first in the series is entitled "The Meaning of Motherhood," by Dr. S. Josephine Baker, Director of Child Hygiene, Department of Health, New York City.

Other splendid contributions to the November issue are: "The New Press" for Little Children, by Mary Higgins Vorse, in which the author shows how the Montessori principle of education may be applied by practical mothers; "The Movies and the Theater," by Daniel Frohman, the celebrated theatrical manager; "Thought as a Force in Daily Life," by Ralph Waldo Trine; "My Son-in-Law's Wife," by a

mother-in-law; "Little Courtiers of Social Life," by Christine Terhune Herrick; and "Reducing the Meat Bill," by a retail butcher.

Picton of special interest is contributed, Margaret Deland begins a new serial story, and other fiction is contributed by Mary Houston Vorse, Quincy Germaine, Juliet Wilbur Tompkins, Pattence Boyler Cole and Zoua Gale.

The regular Cooking, Fashion, Housekeeping, Home Decoration and Young People's Departments are filled with good things. Special art features and musical contributions complete an issue of unusual beauty, interest and practical value.

The November American Magazine.

In the November American Magazine Marvonne Thompson begins a new serial story entitled "The Woman's Law." It is a story of double identity; time, the present; scene, New York. It starts out with the proposition made by a judge who said he could find his double in New York City inside of a half hour—his double, as regards height, weight, shape of the head, color of eyes and hair, his double in these and all of the characteristics that can be conveyed by a description. In the story, a woman, in order to protect her child, acts on this opinion expressed at a dinner party by a judge, and substitutes an innocent man for a murderer under circumstances that make an interesting and thrilling story.

Ray Stannard Baker writes an article entitled "The Glory of Panama," in which he shows how the Big Ditch, dug in honor, is a fine example of the new idealism in business. He commends Uncle Sam's work highly and says that as an example of efficiency it would be worth all it cost if it should be totally destroyed at the time of its opening.

Peter Clark MacArthur goes on with his series entitled "Those Who Have Come Back"—true stories of men who, disgraced or failures at forty, have regained their powers and made a success. This month he tells about the story of a bank robber who has reformed. George Fitch writes another homebody sketch; Ida M. Tarbell describes a trip in a flying machine; a prominent theatrical manager tells how actors, authors and producers divide the people's money and James Montgomery Flagg and Stephen Leacock contribute humorous sketches. "Interesting People" and "The Interpreter's House" are full of good reading, five or six fiction writers tell stories, and the prize winning letters in the contest entitled "What I Am Most Thankful For" are included.

EXETER.

Uverhill High school has canceled the game scheduled for this afternoon.

with the Academy second team.

The editors of the Phillips Exeter Monthly this year are Samuel C. Strout, 24, of Portland, Me., managing editor; Alfred Putnam, 14, of Philadelphia, assistant; Merrill Anderson, 14, of Exeter, secretary; Julius Ripponstein, 14, of Perth Amboy, N. J., business manager, and Lee A. Glendel, 15, New York, assistant. The initial issue for the year is an Exeter number and the leading article is "Dr. John Phillips and the Founding of the Academy." A new feature is a double page of amusing cartoons on school incidents.

At the initiative of Rev. I. S. Jones and Lewis Perkins of Hampton, a descendant of Rev. Ebenezer Thayer, pastor of that town in 1795-92, has given funds to erect the stones and put in fitting condition the graves of Mr. and Mrs. Thayer in Hampton's older cemetery and \$100 for their perpetual care.

GIRL DARES AND FINDS DEATH ON R. R. TRACKS

Wilkesbarre, Pa., Oct. 25.—Twelve girls walked up the Delaware & Hudson railroad tracks abreast yesterday and agreed to see how long they could remain on the rails and still escape an approaching engine. They walked toward the engine hand in hand, with Bertha Boliski, 18, and Tillie Novak in the centre of the line. They were unable to get off the track in time. The Boliski girl was killed and Miss Novak seriously injured.

CLASSIFIED ADVERTISEMENTS See Page Seven.

SAGESMAN—Reliable man for Portsmouth, also open territory in New Hampshire, to sell our imported and domestic and hand colored calendars; also advertising specialties; liberal proposition to the right man. Thos. J. Beckman Co., 321 Filbert Street, Philadelphia. Oct 24, n 1-5

Will sell for \$20.00 foreign value \$50.00. Magnificent sets were abased and confiscated by the United States government from international smugglers for improper payment of duty. Will send by express C. O. D. Privilege of inspection, all expense prepaid. Address: sales manager, Mr. Keene, 334 West 24 St., New York.

CURRENT OPINION

WOMEN
DON'T CARE
TO VOTE

IT TAKES some fortitude to come out and acknowledge that one has been in the wrong. After due observation, study and deliberation, I am willing to make such a confession. As secretary of the California Political Equity League, the largest suffrage organization in California, I gave without remuneration over a year of my life, working for suffrage. And now all I have to say is that, if I had it to do over again, I would work twice as hard, if that were possible, against it.

As a member of ten clubs and organizations, also as registrar, precinct captain, worker at headquarters and at the polls, I have had more than ordinary opportunity to observe and watch the workings of suffrage, and I consider the result not only unsatisfactory and disappointing, but disastrous. It is most unsatisfactory, because what was surmised has been demonstrated, that the majority of women not only do not care to vote, but have no interest whatever in suffrage. The New York woman who came out to California and found that women did not turn out well at the polls—that suffrage is a failure—found out the truth.

Just recently the California suffragists sent out workers to initiate the New York women into the California modus operandi. Suffragists assert that women will purify politics. On the other hand, I have found that women in politics are no better than men. The women of Colorado have had suffrage nearly twenty years, but from what I have seen I don't believe the women of Colorado are any better off economically or in any other way than the women of the worst anti-suffrage state.—Miss Annie Buck, a former California Suffragist.

TO COVER THE ENTIRE SYSTEM

In Examining Condition of B. & M. Property, Mr. Felton Will Travel Every Mile of Track.

With a view to determining the exact condition of the property of the Boston & Maine Railroad, Samuel M. Felton, president of the Chicago Great Western Railroad and receiver of the Pere Marquette Railroad, yesterday put in the second day of a thorough investigation which will occupy several weeks.

At their meeting two weeks ago the directors of the Boston & Maine decided to retain the services of Mr. Felton for this purpose, but no public announcement of their decision was made until President Howard Elliott of the New Haven Railroad mentioned it Thursday at the hearing before the Interstate Commerce Commission.

President Morris McDonald of the Boston & Maine believes that the road has not been properly conducted during the last 25 years; he is heartily in favor of the investigation by Mr. Felton and will assist him in that work.

The first step in the investigation was made Thursday, when Mr. Felton on his way East, stopped at Rotterdam Junction and made a minute inspection of the freight yards there. Mr. McDonald left the North Station Thursday night to join Mr. Felton, and during the next few days the investigator and his assistants will traverse every mile of track owned by the company.

Particularly careful inspections are to be made of the yards and stock at Mechanicville, N. Y., the Boston & Maine's largest yard and the point where the system is crossed by the main line of the Delaware & Hudson Company; at White River Junction, Portland, Greenfield and Fitchburg.

Mr. Felton has been a railroad man since 1868, starting as rodman on the old Chester Creek Railroad. From 1882 to 1884 he was general manager of the old New York & New England Railroad, and in 1890 became president of the Eastern Tennessee, Virginia & Georgia railroad. Since then he has been president, director and receiver for various roads.

COMING NEXT WEEK

Jack Dolan, and his 8 beautiful White Polar Bears—The great Polar Bears, snarling and scurrying dangerous brutes weighing from 400 to 750 pounds and standing 5 feet to 7 feet 2 inches are the biggest novelty headliners in the big vaudeville houses. Jack Dolan is the youngest bear trainer in the world and puts the dumb brutes through their paces by hard work and genuine danger for he bears many marks of their claws and tusks, and at every turn one of them is apt to snatch at him. The bears are well trained. As an attraction for the children they are a wonderful drawing card, and grown people will find them an amusing novelty, wonderfully well trained and fearlessly handled. It is the class of act that should draw large crowds.

At Portsmouth Theatre, Monday, Tuesday and Wednesday.

AGE IMPROVES TORPEDO BOATS.

Newport, R. I., Nov. 25.—That some of the torpedo boat destroyers have improved rather than deteriorated was demonstrated today when the fourth and fifth divisions engaged in speed and smoke trials. One of them, the Jouett, exceeded her contract speed, while the Beale scored 100 per cent in a smoke test trial. The 10 boats comprising the two di-

visions, were the Managham, Ammen, Burrows, Patterson and Trippe, in the fourth division, and the Jouett, Beale, Fanning, Jarvis and Jenkins, in the fifth.

The Jouett averaged 32.9 knots in her two-hour speed test and the Beale made 29 knots, while the other eight boats averaged over 27 knots. The Beale ran four hours with no smoke. The two divisions will engage in the different navy yards tomorrow for two months overhauling, after which they will join the battleship off Guantanamo.

SOUTH ELIOT.

Advent Christian Church—Sunday school 10:30 a. m. Preaching 2:30 p. m., subject, "The new birth." Preaching 8:30 p. m., subject, "I believe." All are welcome to these services. Seats free.

FUNERAL NOTICE.

The funeral of Mrs. Polly Jones will be held from the home of her daughter Mrs. Samuel A. Reed, Sunday at 2 o'clock. Friends invited.

There were five drunk and seven lodgers on the police blotter last night.

JEROME HAS NEW PAPERS

Leaves for Concord With Attorney General Kennedy. Glynn Signs Requisition.

Albany, N. Y., Oct. 24.—William Travers Jerome and Deputy Attorney General Kennedy left today for Concord, N. H., armed with new papers requesting the return of Harry K. Thaw to this state. Governor Glynn signed the new requisition for extradition late today after a conference with Jerome, Kennedy and Attorney General Curdum.

While it was agreed that new papers were not absolutely necessary it was decided that they be issued in order that there might be no question raised as to the validity of the requisition formerly made on the New Hampshire authorities.

The original requisition was based on his indictment yesterday in New York for alleged conspiracy.

Owen W. Bohan, attorney for Richard Butler and Eugene Duffy, who were indicted with Thaw on a charge of conspiracy growing out of Thaw's escape from Matteawan, called at the criminal courts building today and arranged to surrender his clients. He said tonight that unless they are arrested in the meantime, Butler will give himself up next Monday and Duffy not later than Wednesday.

Mr. Bohan denied there was any possibility of Butler making a confession as soon associated with the prosecution seemed to expect. "As soon as Butler and Duffy heard of the indictment they communicated with me. They are innocent and will demand a speedy trial," he said.

The district attorney's office received information that a roundabout way that Roger Thompson and Michael O'Keefe, the other men named in the indictment, will surrender as soon as their friends can communicate with them and arrange for bail.

OLD GOVE HOME BURNS.

Built at Seabrook by Instigator of Rebellion in 1713.

Fire Friday morning of unknown origin, destroyed the fine old home, at Seabrook, built in 1713 by one of the sons of Edward Gove, who for the instigation of Gove's rebellion in 1688 was convicted of treason and three years imprisoned in the Tower of London. The house, which was in good preservation, had always been owned and occupied as a summer home by William H. Gove of Salem, Mass. With it were burned much fine old furniture and other valuable antiques. The burn was saved.

Nearly a few weeks ago, was burned the Gove house, the birthplace of Meshech Weare, president of the council and chairman of the Committee of Safety throughout the Revolution and the first president of the State under its constitution of 1784.

"PEG O' MY HEART."

Oliver Morosco will send J. Hartley Monner's exquisite comedy, "Peg O' My Heart," to the Portsmouth theatre Thursday, Oct. 30. So much that is good has been said of this New York production in the metropolitan magazines and papers that a detailed description is unnecessary. Suffice to say that the success of the piece is largely due to its freedom from the slightest sus-

COMFORTING WORDS

Many a Portsmouth Household Will Find Them So

To have the pains and aches of a bad back removed, to be entirely free from annoying, dangerous, urinary disorders, is enough to make and kidney sufferer grateful. The following advice of one who has suffered will prove comforting words to hundreds of Portsmouth readers.

Mrs. John M. Smart, 122 Gates St., Portsmouth, N. H., says: "Eight or nine years ago I began to suffer from pains in the small of my back which at times changed to a dull grinding ache and if I overexerted my suffering was intensified. I felt tired nearly all the time and had but little energy. Having reason to believe that my kidneys were disordered, I began trying various remedies but without success. Until I procured Doan's Kidney Pills at Philbrick's Pharmacy. The contents of two boxes improved my condition in every way."

Available by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

CHICHESTER'S PILLS

THE CHICHESTER PILLS FOR THE CURE OF ALL THE AFFECTIONS OF THE BOWEL. They are the most reliable and most effective of all the pills ever made. They are sold by all druggists and chemists.

of the unclear or sensational. "Peg" is played by Peggy O'Neill, whose first name in real life is not only the same, but her life is as near a parallel to the simple, wholesome and lovable being in the play as is possible. Brimful of Irish wit which flows from her rosy lips as the crystal water from a spring, "Peg" tells a story that made mid-Manhattan, staid and blasé, forget the more sensational attractions for this beautiful story of refreshing youth.

Mr. Morosco has engaged an auspicious English company with Fred L. Tilden as Jerry, Grace Thorne Coulter as Mrs. Chichester, Gaiety Herbert as Alaric, Fraser Coulter as Brent, A. J. Hendon as Jarvis, Olin Field as the Maid, and Reginald Carrington as Hawks, not forgetting "Michael," the Irish terrier dog that plays such an important part.

KITTERY POINT

What Is Happening In the Harbor Town.

Mrs. Lucy Weeks is able to be out after her recent illness.

The S. V. Pancy Work club was pleasantly entertained on Friday evening by Miss Augusta Phillips.

Lewis Billings of Boston is calling his parents, Mr. and Mrs. Thomas Billings.

The Riverside Reading Club will meet on Friday, Oct. 31, at the home of Mrs. James H. Walker.

Joseph Boyer is enjoying a vacation from his duties as motorman on the A. S. R. R.

George Godfrey has resumed his duties at the Jennison place on Gerish Island, after being laid up for several months with a broken ankle.

Mrs. Mary Lawrence of Portsmouth is visiting relatives in town.

The Junior Christian Endeavor Society will meet in the First Baptist church at 11:30 on Sunday forenoon.

Leah Riley is enjoying a vacation from his duties as conductor on the A. S. R. R.

Mrs. C. W. Walker of Portland, Me., is visiting her daughter, Mrs. Roy Phillips.

Arrived—Schr., Rebecca Palmer, from Norfolk, Va. Schr., Augustus, from Philadelphia. Schr., Sarah L. Ayis, Boston for Rockland. Schr., Priscilla, (British), Boston for St. John, N. D. Schr., Charles H. Trickey, Augusta, Me., for Fall River. Schr., Augustus, Me., for N. Y.

Services at the Free Baptist church Sunday, Oct. 26, at 2 p. m.: Sermon by the pastor, Rev. Roger W. Churchill, "The New Man in Christ Jesus." At the Bethel service in the evening, Mr. Churchill will give "A Kindly talk on the nature and use of tobacco."

Mrs. Frank Locke of Kittery was the guest of Mr. and Mrs. J. Q. Irish on Thursday.

Services in the First Christian church on Sunday afternoon, Oct. 26, Rev. Winifred Coffin will take her text from Mark 11:22, "Have Faith in God." Subject, "Mustard Seed and Mountain." HUNT SECOND BANDIT IN VAIN

Fifteen-Year-Old Desperado Slips Out of Police Mesh.

The police of Boston and surrounding towns are searching for Wilfred Reault, or Green, companion of William Dubois, the boy bandit who was arrested at Waterdown yesterday, after he had been badly wounded. No trace of the second boy desperado has been found since he separated from Dubois and put off in a boat headed up the Charles river toward Bemis. Reault or Green, is even younger than Dubois. He is said to be only 15.

The boat in which Reault fled belongs to a Brighton man and was used for crossing to the arsenal. It was taken by the boys early yesterday morning. The police know that Reault was headed toward Belmont, but they are uncertain whether he kept on walking or "jumped" a freight. Dubois said they separated because they believed they would be less likely to be caught.

When arraigned in the juvenile session of the Waltham district court yesterday morning Dubois' head was swathed in bandages. He was sullen and appeared dazed from the effects of his wounds. The case was continued to Monday, with bail fixed at \$500. The charge against him is assault with a dangerous weapon with intent to kill Patrolman John Clifford of Wintertown.

Says He Fired Into Air.

Weak from his wounds the boy, for he will not be 17 years old until May 26 of next year, was supported on either side by Chief Thomas P. Lyons of the Watertown police and Patrolman Clifford, the complainant. He was taken before Judge Eben F. Luce, and his case continued. He was remanded to the East Cambridge jail to await his hearing.

Learning that he was on parole from the Lyman school, the state board of charities was notified of his plight as were his parents.

The boy denied any intention of shooting any one, declaring that he always fired into the water or into the air, and told a pitiful story of his life, crying like the child he is when ever he mentioned his little sisters.

He said he had been to school but one year in his life. Soon after his year at school, his parents moved to Lawrence and he was compelled to go to work in the mills there, and was never thereafter able to attend school.

He sticks to his statement that his companion was named George Green, and says Green is but 15 years old. He first met Green at the railroad station in Lawrence Saturday night, when Green came to him and sold the police were after him for breaking into a hardware store and asked Dubois to go out West with him and become a cowboy.

Green had a bag, four revolvers and about 200 cartridges. The boys each took two guns and then started on their way to caton, stealing rides on freight, walking part of the time, but, according to his description, in a very roundabout way. Dubois was unable to describe the exact route taken, but had jotted down on a piece of paper the names of stations they had passed while riding on freight trains. His list included the names of Lowell, Somerville, Worcester, Framingham and Reims.

Breaks Down and Cries.

In mentioning the names of his mother and his little sisters, Jennie and Antoinette, he would break down and cry.

The metropolitan police officers who spent the morning dredging the river at the point where Dubois threw away a number of articles, recovered a pair of shoes, two boxes of cigarettes, a roll of unused camera films and a package of developed films, marked Mrs. P. L. Stanley, whose home in Lowell was broken into on Wednesday night.

The boy said that he also threw away a camera but that has not been recovered.

Chief Gilman of the Charles river district metropolitan police said he would not prefer any charges against Dubois, so that the only charge at present is that of assault upon a policeman, although the Waltham police may press the charge of breaking into a home.

The boy said that he also threw away a camera but that has not been recovered.

evening at 7.30. The meeting will be led by the minister. At the close of the service, the monthly official board meeting will take place. All officers take notice.

EATON'S HABITS FURTHER AIDED

Physician Serving Jail Sentence Admits Arsenic Prescription Called for 4600 Pills.

Plymouth, Mass., Oct. 25.—The defense in the trial of Mrs. Jennie May Eaton for the murder by poison of her husband, Rear Admiral Joseph G. Eaton, introduced evidence yesterday in support of its two main contentions, that the admiral was addicted to the use of drugs, and that his wife, instead of plotting his death, loved him and was loyal to him.

Stories of apparent intoxication on the part of the admiral were told by Peter S. McNally, a newspaper reporter; Miss Mary M. Simmons, a school teacher; Lieut. R. S. Keyes, a naval officer; and Dr. Benjamin S. Blanchard and Dr. Jacob W. Brown, physicians.

Mr. McNally described the admiral's behavior and appearance on "special occasions," saying that he appeared to be under the influence of liquor, but that the odor of liquor could not be detected on him.

Lieutenant Keyes said that when Admiral Eaton was a captain in command of the battleship Massachusetts he spent an entire night on deck clutching the rail.

Admiral Bought 5600 Pills.

Evidence introduced by the government indicated that the admiral's death was due to arsenic poisoning. To explain this condition the defense called Dr. Brown, a former Boston practitioner, but now serving a 30 term for illicit practices, who testified that at Admiral Eaton's request he had prescribed a preparation containing arsenic. The prescription called for 5600 pills, each containing one one-hundredth of a grain of the poison.

Testimony indicating that the admiral and Mrs. Eaton lived happily together was given by Judge George W. Kelley, a friend and legal adviser of the family, and by Patrick P. Ford, a music teacher. Judge Kelley said that when he proposed to Mrs. Eaton that the admiral be either arrested or committed to an insane asylum because of his alleged insanity, Mrs. Eaton told him that she would not permit anyone to harm a hair of her husband's head.

The admiral had packed his wife to Judge Kelley, and both husband and wife showed affection for each other. Mr. Ford testified that to all appearances the Eaton home for a happy one. Mrs. Eaton will testify today, and the remaining witnesses for defense will be heard Monday.

His Comment.

"They say that women keep the wheels of commerce going." "Maybe so. Here's a woman's program when she buys anything: She opens a handbag, takes out a purse, opens the purse and takes out a coin, shuts the purse and opens the handbag, shuts the handbag and adjusts her veil. I think business would slump if a man had to do all that every time he made a five-cent purchase."

Both?

"An acclivity," said the teacher. "Is a slope up; a declivity being a slope down." "Then," asked the class proudly, "upon which would I be standing if I were on a side hill? It runs both ways." But the teacher was making little Johnny Jones throw away his chewing gum.

Charge Girl Stole.

\$2000 FROM JOHN D.

New York, Oct. 24.—Mrs. Evelyn P. Rutherford, a bride of one month, was arrested today on an indictment charging her with cashing 100 \$20 coupons on Southern Pacific 4 per cent bonds belonging to John D. Rockefeller.

The young woman before her marriage was employed in the coupon department of the Southern Pacific railway.

It is alleged that on the day she gave up her position to be married to James A. Rutherford, she conspired the coupons about her person and deposited them to her credit in a bank at Atlantic Highlands, N. J., where she resided.

Both?

"An acclivity," said the teacher. "Is a slope up; a declivity being a slope down." "Then," asked the class proudly, "upon which would I be standing if I were on a side hill? It runs both ways." But the teacher was making little Johnny Jones throw away his chewing gum.

EATON'S HABITS FURTHER AIDED

Physician Serving Jail Sentence Admits Arsenic Prescription Called for 4600 Pills.

Plymouth, Mass., Oct. 25.—The defense in the trial of Mrs. Jennie May Eaton for the murder by poison of her husband, Rear Admiral Joseph G. Eaton, introduced evidence yesterday in support of its two main contentions, that the admiral was addicted to the use of drugs, and that his wife, instead of plotting his death, loved him and was loyal to him.

Stories of apparent intoxication on the part of the admiral were told by Peter S. McNally, a newspaper reporter; Miss Mary M. Simmons, a school teacher; Lieut. R. S. Keyes, a naval officer; and Dr. Benjamin S. Blanchard and Dr. Jacob W. Brown, physicians.

Mr. McNally described the admiral's behavior and appearance on "special occasions," saying that he appeared to be under the influence of liquor, but that the odor of liquor could not be detected on him.

Lieutenant Keyes said that when Admiral Eaton was a captain in command of the battleship Massachusetts he spent an entire night on deck clutching the rail.

Admiral Bought 5600 Pills.

Evidence introduced by the government indicated that the admiral's death was due to arsenic poisoning. To explain this condition the defense called Dr. Brown, a former Boston practitioner, but now serving a 30 term for illicit practices, who testified that at Admiral Eaton's request he had prescribed a preparation containing arsenic. The prescription called for 5600 pills, each containing one one-hundredth of a grain of the poison.

Testimony indicating that the admiral and Mrs. Eaton lived happily together was given by Judge George W. Kelley, a friend and legal adviser of the family, and by Patrick P. Ford, a music teacher. Judge Kelley said that when he proposed to Mrs. Eaton that the admiral be either arrested or committed to an insane asylum because of his alleged insanity, Mrs. Eaton told him that she would not permit anyone to harm a hair of her husband's head.

The admiral had packed his wife to Judge Kelley, and both husband and wife showed affection for each other. Mr. Ford testified that to all appearances the Eaton

HOW UNCLE SAM SAFEGUARDS HIS CURRENCY

Interview On the Subject With the Director of Uncle Sam's Money Factory.

Can you think of a kind of paper that would be really "different?" The changes are that if you can Uncle Sam will reward you handsomely, for Uncle Sam is very much in need just now, of just such a novelty.

But don't grow hopeful before you know what is required. Mind you, the sort of paper that will meet the government requirements must be genuinely distinctive and it must be distinctive in every sense of the word. Moreover it must be so unique that nobody can imitate it successfully. Indeed, that is the object, to make it beyond the possibility of imitation.

Probably you have guessed by this time the object of this Federal "paper chase." It is to afford a new means to thwart the counterfeit. The paper which has heretofore been used in the manufacture of our currency is distinctive and the source of supply is controlled that no interest other than the Treasury department can purchase it. It has served its purpose, too, this familiar paper with the silk threads that so many look for as a guarantee that a bank note is "good," but impelled by the spirit of progress and improvement, the officials at Washington have gained the idea that maybe something even better can be discovered in the paper line.

A Talk With Uncle Sam's Money Maker.

To get expert opinion on counterfeits is no easy matter because the men who know most about the subject do not like to call attention to the existence of counterfeits by discussing them. The following is the fullest statement on the topic ever made by the man who, above all others in the United States, has made a study of the subject, namely, Mr. Joseph B. Ralph, the Director of the U. S. Bureau of Engraving and Printing, where is produced all the paper money in use in this country and in the American possessions over seas.

Taking up the subject of counterfeits in general and their detection, Director Ralph said: "There are two classes of counterfeits, viz, simulative and exact. Simulative counterfeiting is that class that has the appearance of real money but will not bear close inspection. A very striking example of this class is a certain well-known old painting by a celebrated artist that has deceived many wagers as to whether it was a real bill or a paint? ing when hung upon the wall, but which, of course, would not deceive any one upon close inspection. Exact counterfeiting is virtually impossible unless one had access to the appliances and knowledge of all the processes now in use in the Bureau of Engraving and Printing.

"It is possible for a counterfeit to belong to both these classes but the great majority of counterfeits belong to the simulative class and require only reasonable care and scrutiny to be detected. The danger to the public arises when a counterfeit is so close to the exact class as to usually escape detection. As a general rule, the longer a counterfeit is in circulation the nearer it approaches the exact class, the flaws or differences being hidden by the effects of wear, dirt and age.

Preventatives of Counterfeits. "The methods in common use to prevent the counterfeiting of bank notes consist of the employment in currency manufacture of distinctive printing; intricate engraving; multi-color designs; and distinctive paper. There being only two classes of distinctive printing, namely, surface and intaglio, the latter is almost universally selected, as it admits of more delicate and intricate lines and has a greater range of light and shade. It is also too expensive to be commonly practiced, and the results, if well done, are sharply distinguished from surface printing. Its chief characteristics are sharpness and fidelity of the lines with great intensity of color in the heavy ones. These features are not possessed by any other known process of printing, as any method of increasing the color in surface printing makes the fine lines coarse and vice versa.

"Before photography became a popular art, intricacies of engraving were considered the principal protection of bank notes and great dependence was placed upon the intricate geometric curves of the currency designs. Inasmuch as the least variation in their precision of information would be apparent for the reason that each curve

was identical or belonged to the same order as its neighbor. Those curves are always produced with great care by a machine of great precision of workmanship and adjustment. However, this system has lost something of its value inasmuch as photography reproduces its chief characteristics—regularity of formation—with ample fidelity.

Portrait Engraving, A Safeguard. "Portrait engraving being the highest type of the art always has been considered and is today, one of the chief safeguards. The expression of a human face is a very subtle thing when produced by a few lines. The least thickening or change in direction will completely alter it. It could seem as though photographic methods would reproduce portrait engraving perfectly but it has been found that in order to secure brilliancy in the printed effect recourse must be made to hand work or retouching in etching that causes enough departure in the line to change the expression sufficiently to be discernible without very close inspection.

"Theoretically, it would seem entirely possible to design a color protective scheme that would preclude photographic reproduction. Extremely intricate and ingenious schemes for protection on this plan have been proposed to us and the Bureau has actually investigated the merits of a great number of these methods ranging all the way from the suggestion of a type of paper wanted bank notes printed upon paper closely ruled with yellow lines to a complex system of selected colors arranged by Mr. Frederick Ives. Even this latter system is of doubtful value, however, and will become less so as the science of photography advances.

"An English expert has amplified the color protection scheme so as to include a secret emblem or mark, ordinarily viewable only through a ruled screen. This method is novel and valuable as the multitude of lines now on our U. S. notes, reproduced with such precision and fidelity by the transfer process, form a continuous secret code for direct comparison with a proof of the original plate and a counter felt will soon disclose any hand work, especially in the finer lines. Color protection schemes in general make it extremely easy to produce a simulative counterfeit. Their intricate lines and brilliancy distract the eye from the main design so that a simple three color reproduction will suffice for the ground work and a surface print of the main design will answer, the luminosity of the paper being reduced by a mass of colored dots. Moreover continuity of lines, tone values, etc., are all lost in the maze of colors.

The German Idea a Good One. "The German notes embody a color protection scheme that does not have the disadvantage just mentioned in a pronounced degree. Moreover, the Germans make use of a tint that baffles the usual photographic processes and they also emboss the paper so that while the note is new and available for an photographic copy the actual lines are quite distorted. Also, the characteristics of intaglio engraving are amplified by employing blind engraving and using ink that approximates the varnish laden stamping ink.

"The notes put out by the German government show more study and advancement than any of the other foreign currency and are undoubtedly well adapted to the conditions in the country where they are in use. To be sure they are open to easy simulation but that is a condition that is probably of little concern to the Germans because notes are not so much in universal circulation in the German empire as they are in the United States, and the German people are not as careless in receiving money. It is a fact that the German notes are more expensive to produce and will go a long way common to the United States notes notwithstanding their disadvantages it is a question if their expense should not be followed in part at least, in the design of the paper money of the United States.

Distinctive Paper is Important. "Some distinctive feature of the paper such as watermarking or the insertion of the colored fibre, is considered the best method of circumventing the

Always at Your Service.

of little if any value as a protection against counterfeiting, as it may be stimulated by localized pressure, but meditation or reinforced watermarking as it is called seems to be of some value and may yet be adapted for the U. S. notes if it can be introduced in paper of long and strong fibre. The insertion of various materials in the web of the paper as it is formed has been promised from time to time, but all such safeguards may be stimulated by a counterfeiter will take the trouble to paste two or three sheets together.

The Raising of Bills. An important phase of this subject of distinctive paper is found in the need for means that will prevent the raising of bills. It is highly desirable that counterfeits be prevented if possible from procuring distinctive paper for counterfeit bills of high denomination by raising the printing from genuine bills of lower denomination. A well worn fairly executed counterfeit may be passed as genuine if it is printed upon genuine paper as the pressure of the silk fibre and the feel are considered by some persons as undoubted evidence of authenticity.

A recent counterfeit a \$50 bill was made in this way and it required close examination to detect differences in color and texture. In order to reproduce the distinctive feature would require considerable machinery of such a character that it would not be secreted of used without attracting attention. And in addition thereto expert knowledge and considerable experience in paper making would be necessary.

The paper used up to date by the United States government is distinctive in other ways than merely the localized fibre. The surface texture of a new bill does not disclose it but a particularly worn one does. The peculiar feel of a partly worn bill not due to age and wear alone but to certain treatment of virgin stock and the varied processes that a bill goes through the bureau—processes which are ordinarily employed in handling paper. The localized fibre, which readily stimulates by the pen as it requires very close scrutiny to disclose the counterfeit, is nevertheless, a widely known and easily determined protection.

What is known as water marking in the background could be discovered. The requirements of a method of preventing counterfeiting are probably well understood by all persons who have looked into the subject. It must absolutely prevent simulative counterfeiting. Whatever method is used should not be capable of reproduction without the use of extensive machinery for a secret process cannot remain secret for any length of time. Moreover the successful safeguard against counterfeiting cannot be one of many that can be detected by reasonable wear and rough usage and yet the cost should not exceed the present cost of producing bank notes.

NEED OF HOME INSTRUCTION. It would not be necessary to have all this public argument about using the schools for instruction in sex hygiene, if the influence of the home were all that it should be. It is wrong to the children and to the schools alike to demand that the children shall learn in the schools all that the home should teach. This applies not merely to physiological problems, problems of hygiene, but to the standards which are right and wrong, the things that are not wholly and intuitively matters of inherited conscience. Whatever the schools may or may not do, they can never take the place of a wise father and a wise mother.—Boston Advertiser.

WANTS MORE PATERNALISM. The great trouble with small supplies of water in Massachusetts or anywhere else is that local influence too often protects those whose acts menace the source of supply. The same is true about milk supplies and other local food industries. One of the greatest reforms Massachusetts could make would be to hand over all authority in the State, under the health laws to the State Board of Health, leaving it to that body to formulate the rules and to appoint the officers for the protection of public health in every locality.—Boston Advertiser.

MAJOR VETOES POLICE COMMISSIONERS' BILL. Mayor Daniel W. Hodges has vetoed the police commission salary, introduced by Councilman Adams and passed by the City Council on Thursday October 16, because it goes back of the time that it has authority to. The mayor's letter of veto was filed with the city clerk on Thursday and it is self explanatory.

MAJORITY OFFICE, OCT. 23. To the Honorable Council:

The late Board of Public Commissioners, whose term of office terminated August 31, 1913, pursuant to an act of the legislature, held office until Sept. 12, 1913, and has been paid by the City of Portsmouth in full for services to that date. The new board of commissioners were sworn into office Sept. 1, 1913, and is entitled to compensation from that date.

This resolution provides that it shall take effect from August 1, 1913, a hereby veto the resolution and return it to the council in order that it may be reconsidered, redrafted and corrected.

DANIEL W. HODGES, Mayor.

AN IMPORTANT SCHOOL DECISION

Boston, Oct. 24.—The full bench of the full judicial court in sustaining the exceptions of the inhabitants of Sherburne in a suit brought against it by a Union P. Harnard, has given an important decision as to the rights and powers of School Committees to expel from a particular school a pupil who is deficient in his studies providing that they give the pupils an opportunity to continue studies in another school to enable him to reach the required standard. In such a case the court holds that under the statute an action cannot be maintained against a town for unlawful expulsion from the public schools.

Harnard was expelled from the Arms Academy in Sherburne because his tapping was not high enough, but he was given an opportunity to attend the Middlefield school in that town. The boy, however, decided to go to the Greenfield High School and in a suit brought against the inhabitants of Sherburne, and tried in the Superior Court, obtained a verdict of \$325.

RETAIL LUMBER DEALERS IN COMBINE

Washington, Oct. 24.—The right of middlemen to take steps to prevent wholesalers from selling direct to consumers today came before the Supreme Court when the suit of the government for alleged violation of the Sherman anti-trust law against the retail lumber dealers in the Eastern States was up for argument. The retailers were enjoined in the New York Federal court from circulating lists of wholesalers who sold direct to the consumers.

Among the consumers to whom sales by wholesalers were deemed objectionable by combined retailers according to the government, were the Standard Oil Company, the General Electric Company, Stetson Hat Company, Bald win Locomotive Works, Cramp Shipbuilding Company, Foran Foundry Company and the United Lead Company.

The Delineator and Fashions

Butterick's Publications are indispensable in Home Planning, Home Furnishing and Home Sewing.

The suggestions in the November number of the Delineator are timely.

"Gift Sewing," an article on Embroidery.

Our new Embroidery patterns and materials for the Holiday season are being shown.

"The easiest way to make the new Japanese Waist."—By Mrs. Chalmers.

Our Materials and Trimmings were never more attractive and are adapted for use in the development of patterns and illustrations in Butterick's Winter Fashions.

THE D. F. BORTHWICK STORE

LOCAL DASHES

Today's weather is not pleasing to the local merchants.

Mallards in police circles are unusually quiet at the present time.

2 boxes smoked herring 25c at Clark's Branch. Tel. 123. 1/23, 1/24.

Eight automobile lamps at 5.17 each this evening.

John H. Dowd's Marble and Granite Monumental Works, 52 Market Street.

Upholstering, hair mattresses renovated. Margeson Brothers, 140 No. 570.

Steamer Kennerly seems to be slightly slow in arriving back from Manchester.

Lobsters and fish of all kinds caught by our own boats, fresh every day. E. J. Janssen & Sons. Tel. 163.

Richard H. Donaham contemplates making some improvements to the former Welch property on Hanover street now owned by him.

22 lbs. blue black salted pork for \$1.00; 100 lbs. for \$4.25 at Clark's Branch. Tel. 123. 1/23, 1/24.

Much interest is manifested in the old published dance to be held at Freeman's Annex on Tuesday evening next by well known parties.

The members of the high school football team were disappointed that the weather conditions were such today that they could not try their mettle against their up-river opponents.

Hard and wet road for sale, sawed, split and delivered. Teaming and furniture moving. Lowest market prices. Reagan & Clair, 235 Cate street Tel. 1184 M.

Misworth Thayer of Phillips Exeter academy is passing the week with his parents, Rev. and Mrs. L. H. Thayer of State street.

Engineer Oliver J. Goldsmith has been assigned to the run on the Portsmouth and Dover branch to fill the vacancy caused by the death of Engineer Charles D. Hill.

Our estimable citizen John B. Hart is today quietly observing his eighty-fifth birthday. For one of his years Mr. Hart is very active and enjoys excellent health.

Civil Engineer has been invited to address the 15th National Conservation Congress at New Willard Hotel, Washington, D. C., Nov. 18 to 20, but declined because he addresses two waterways conventions in Florida the same date.

Miss Margaret L. Marston, daughter of Mr. and Mrs. Everett L. Marston of this city, was one of the successful contestants of the sophomore class at Wellesley college for the track team in running and jumping, and gives the winner the right to wear the 16 and numerous, an honor much sought after. Miss Marston was a member of '12 class, P. H. S.

TEXTILE WORKERS ELECT GOLDEN 10TH TIME.

Philadelphia, Oct. 25.—John Golden of Fall River, Mass., was yesterday re-elected president of the United Textile Workers of America, defeating Tobias Hall of Philadelphia, by a vote of 71 to 13. This makes the 10th successive time Golden has been chosen president. James Tansey, also of Fall River, was re-elected first vice president.

The union adopted a resolution favoring a law prohibiting the employment of children under 14 years of age. The resolution was introduced by Samuel Roser of New Bedford, Mass.

The convention also adopted a resolution favoring pensions for widows.

ITEMS OF INTEREST TO NAVY YARD EMPLOYEES

Changes Among Officers.

Commissioned—Commanders J. M. Reeves and D. P. Sellers, Assistant Surgeon J. T. Borden, Commander G. W. Laws, detached command the Dolphin, home, wait orders. Lt.-Comdr. H. E. Bartle, detached connection fitting out the Hatch, Command the Dolphin. Lt. H. M. Jones, detached Union Iron Works, to command D-1. Ensign C. C. Clark, to treatment Naval Hospital, Washington. Ensign M. B. McComb, detached the Walke, to the Drayton. Surgeon C. C. Griggs, to Naval Hospital, Los Angeles. Col. Passed Asst. Daymaster S. J. Westlake, to receiving ship at Mare Island. Machinist T. J. Hayes, detached the Olympia, to sick leave. Ensign R. J. Thornton, detached the Pompey, to treatment, Naval Hospital, Mare Island. Naval Constructor J. H. Walsh, detached Naval station Olongapo, home and wait orders.

Marine Corps Orders.

Capt. D. C. McDougal, detached marine barracks, Boston, Mass., to Naval War College. 1st Lt. C. S. McElroy, detached the Albany, to the Rainbow.

Movements of Naval Vessels.

Arrived—Pontiac at New York, Judd at Norfolk, Panther at Hampton Roads, Tynan at Boston, Truxton at San Diego, Chequamegon at Bremerton, Villalobos at San Diego, Quilac at Nanking, Tennessee and Pringle at Philadelphia.

Sailed—Birmingham from San Francisco for Honolulu; Tacoma from Vera Cruz for Tuzupah; Lucas from Rockland, Me., for Portsmouth, N. H.; Ajax from Shanghai for Guam. The H-1 and H-2 have been ordered in commission at Mare Island and the Albatross at Philadelphia. The flag of the commander of the fourth division, Atlantic fleet, has been transferred from the Kansas to the Connecticut. The Tennessee has been assigned to duty with the Atlantic reserve fleet.

Going to Sea.

Ralph M. Gorth, clerk in the general store, has resigned to accept the position of clerk on the U. S. S. Vulcan.

Another Rush.

Orders have been issued directing that the work on the U. S. S. Montgomery and Hannibal be given preference over all other on the several vessels now at the yard.

One Failed, One Withdrew.

The preliminary examinations of enlisted men for commissions as assistant paymasters in the navy have been completed and today Paymaster John W. Morse forwarded the papers to the navy department at Washington. Ten men failed to take the examination, two failed physically and one withdrew.

Unos Will Stay.

It has been decided finally that the big tug Venus will remain at this yard permanently.

Protest to Daniels.

Machinists of the Charlestown navy yard voted at a mass meeting last night to send a protest to the secretary of the navy because of alleged failure on the part of the yard management to carry out some promises.

"Brennan of the Moor"—Three reels. "He stole from the rich to give to the poor." Featuring the famous Barney Oliver in the title role, all star cast. This story of adventure, romance and realism is adapted from a classical Irish legend of the early Nineteenth Century. The English nobility at that period invaded the Emerald Isle and took possession of the land granted them as favors by the English Crown. The clash of two opposing forces, the nobleman and the peasant, together with the poor whom he patronized, on one side and the autocratic and selfish nobility (who gave only at the point of a pistol) on the other, are forces that meet in a succession of blood-stirring and compelling climaxes. A light in a darkened hall-room, stage-nymph holdups, flooded cells, duels and an escape across a human bridge comprise some of the sensational scenes.

Pathe's Weekly of Current Events gives you all the latest and most interesting happenings of the world at a glance.

"Tony the Fiddler," S. & A., 2 Reels. A melodramatic tale of the Canadian border, well photographed, superbly acted and situations that are unique and exciting.

"A Wall St. Wall," Pathe. "Riding the Flume," Pathe.

Two very interesting subjects on one reel.

Miss Grace Maxfield sings, "Isle D'Amour" and "O' My Heart," in a most pleasing manner.

Matinees 2.30, Evening 7.00, Saturday Evening 6.30.

The Herald Hears

That a Hungarian lottery has favored more than one business man with mail matter in this city of late.

That they went dollar bills and checks only.

That the letters appear to be addressed to business men only.

That the Deer street crossings were cleaned off good and early today.

That one resident in that locality is said to have taken a snapshot of the man with the hat.

That George H. Seavey, a former fireman of the Portsmouth Electric Street railway, now a member of the Boston police force, is covering a night beat on Hanover street.

That Engine 3 of the fire department will come back.

That those who like whist and dancing have no reason to complain as far as the amusement is concerned in this city.

That the governor and council did not meet on Friday.

That Exeter Academy has the largest number of students in the history of the institution.

That Massachusetts leads with 139, New York second with 95 and New Hampshire third with 60. Then come New Jersey and Pennsylvania with 50, Maine 31, Connecticut 20, Illinois and Ohio 17, Rhode Island 12.

That railroad stocks are taking to the toboggan.

That the comptroller of the treasury says, a man's home is where his wife lives.

That if this is so some of the husbands will be conspicuous at the bargain counters.

That more of them will pass some time at the whist table and Woman's Club.

That one member of the Bartenders' Union has a little on the rest of that fraternity.

That he is certainly in the limelight chasing the high ones on the counter rigged up with an overcoat and mit-tens.

That the boys say that Harry will adopt the regulation white coat only after the proprietor finds that stove that belongs in the room.

That they also say they will furnish red paint for the outside and a candle for the inside of the stove when it is in place.

That Chief Baker at the navy yard wireless station has some power left.

That this pleasure craft is one of the best seen on the river in several days.

That the lady navigator who often takes the wheel on this boat, can show some of the deepwater men a thing or two.

That the chief of the New Castle fire department says all his men must have up-to-date fire fighting rigs when he reorganizes.

That they must also be provided with glad rags for parade and inspection.

That if the chief can have his way there will be some class in the fire fighters of the island town.

That the local progressives appear to be busy every minute.

That they are going to start something in the local campaign.

That they deny hobnobbing with either the democrats or republicans.

That they have already decided on a candidate for mayor.

POLICE COURT.

George Robinson was in the district court today and was fined \$10 and costs of \$5.75 on a charge of drunkenness. The police got him at the wrestling bout on Friday night where he was inclined to be somewhat fussy over a ticket. James Bagan for the same offense was drafted for the winter to the school of farming industry. James said he was from Maine, and as a heeler handled the reins on a lot of the animals that burn up the turf with speed. There are not many fast ones at the farm which he can work on the speedway but nevertheless he will find plenty to do, looking after the nags in the stables of the famous Rockingham county institution.

WIDOW IN SALEM WANTS HUSBAND

Pittsburgh, Oct. 24.—Mayor Meltee had his burdens added to today when he had foisted upon him an appointment as husband-hunter. When the mayor opened his mail he found a letter from Mrs. Beatrice Roberts, who said she is 38 and is located at 221 Washington street, Salem, Mass.

"There isn't much chance of meeting good fellows around here, so I thought I would try away from this part of the country," she explained, after assuring the mayor that she is

an attractive widow and would like him to interest himself in her behalf.

DENIES WARRANT FOR PANKHURST

New York, Oct. 25.—Mrs. Emmeline Pankhurst, the militant British suffragette, left New York yesterday for Cleveland, where she will lecture. Chief City Magistrate McAdoo in the afternoon refused to issue any Jane Doe warrants for women who sold "The Suffragette" alleged to have contained matters which might be deemed as obscene. "For this reason," he said, "that I have been informed that a complete set of 'The Suffragette' containing these articles has been examined by Anthony Comstock, and the whole matter submitted to the district attorney. Mr. Comstock informs me that those engaged in selling this work have left the jurisdiction, taking with them the publication in question."

ALLIGATOR PULLS HIS LEG.

New York, Oct. 24.—"Oh, glad it was only the leg that pulled it, my boy!" was the exclamation of "Paddy" Keenan, a keeper in the Central Park menagerie, who had his right leg pulled severely by Dido, a large saurian.

Keenan, who generally takes care of the mimic colony in the menagerie, was delegated by "Billy" Snyder, the head keeper, to take the alligators, lizards and turtles indoors because of the cold weather. The big tank outdoors had been drained, but its bottom was slippery.

Keenan attempted to lasso several of the alligators, and in so doing lost his footing. As he did his right leg shot straight for the mouth of Dido, the largest saurian in the collection. And Dido, with as much facility as "Big Chief" Meyers grabs in a fadeaway, captured the leg unceremoniously thrust upon it. Keenan yelled, and Snyder and his assistants came to the rescue, and were able to make Dido disgorge the member. Three thick-lips of clothing prevented serious injury.

The alligator pulled it, my boy!

Keenan attempted to lasso several of the alligators, and in so doing lost his footing. As he did his right leg shot straight for the mouth of Dido, the largest saurian in the collection.
